PROFESSIONAL SUMMARY

Senior Flutter Developer with 8+ years of mobile application development experience, including 6+ years in Flutter and Dart and a strong native Android background in Kotlin and Java. Builds scalable, production-grade apps for insurance, healthcare, social and enterprise domains using Clean Architecture, BLoC/Cubit, Firebase and REST APIs. Delivered safety-critical features to 20,000+ active users, published a fully offline, privacy-first personal finance app on Google Play, and holds the AWS Certified Cloud Practitioner credential.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Kotlin, Java, Jetpack Compose, Android SDK

State Management: BLoC, Cubit, GetX, Provider, Riverpod

Architecture: Clean Architecture, MVVM, Feature-First Modular Architecture, SOLID Principles, Design Patterns, Dependency Injection

Backend and Data: REST APIs, Firebase, Firestore, Crashlytics, Push Notifications, Google Analytics, Razorpay, Hive, SQLite

Testing and Delivery: Unit Testing, Git, CI/CD, App Store and Play Store Deployment, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Engineer | Momentum Services Pvt Ltd Nov 2022 – Sep 2026

Momentum App: insurance and safety platform for policy holders (Google Play and Apple App Store)

- Built and maintained safety features including Accident Alert, Digital Safety and Maxidor for 20,000+ active users.
- Implemented a feature-first modular architecture with BLoC/Cubit, improving scalability and maintainability of the codebase.
- Conducted code reviews and collaborated with cross-functional teams to maintain high code quality across releases.
- App Link: Google Play store | Apple App Store

Software Engineer | Reliance Industries Ltd Jan 2021 – Nov 2022

MK: social platform where users share ideas and earn rewards

- Developed social engagement features with Flutter and GetX, improving onboarding completion by 25%.
- Architected reusable Flutter modules and UI components, improving maintainability and speeding up feature delivery.

Mobile Application Developer | Argents InfoSystem Pvt Ltd Jun 2019 – Jul 2020

LifeEasy: healthcare app for doctor appointments, ambulance services and lab tests

- Built healthcare app features for doctor appointments, ambulance bookings and lab-test scheduling.
- Contributed to a platform supporting 10,000+ appointments and 5,000+ service bookings.

Android Developer | VKS Computer Services May 2017 – Jun 2019

In2Pix: Android app for viewing, filtering, reviewing and sharing survey images

- Developed Android applications used by 100+ field survey engineers for image capture and review.
- Built FTP-based image workflows that processed 10,000+ survey images.

INDEPENDENT PROJECT

Personal Finance App | Google Play Store Link

- Designed, developed and published a privacy-focused Flutter app for budgeting, expense tracking, investments and loan management.
- Built with Clean Architecture, Cubit and Hive, with biometric authentication, encrypted local backups and a fully offline architecture so user data never leaves the device.

EDUCATION

Bachelor of Engineering in Computer Engineering | Mumbai University 2016

CERTIFICATIONS

AWS Certified Cloud Practitioner | Amazon Web Services Oct 2024
